Neuro-ophthalmology.....	19
Neuro-otology.....	20
Diseases of the Autonomic Nervous System.....	21
Elective Spinal Disease.....	22
Spinal Tumours.....	23
Spinal Trauma.....	24
Tumours and Cysts.....	25
Hydrocephalus and Cerebrospinal Fluid Pathologies.....	28
Neuro-rehabilitation and Spinal Injury Rehabilitation.....	29
Neuropsychiatry.....	30
Neuropsychology.....	31
Neuropaediatrics.....	32

Clinical Assessment

Sessions:
An Approach to the Cognitively Impaired Adult
An Introduction to Neurological Assessment
Common Neurological Symptoms: Behavioural and Organic Mental Symptoms
Common Neurological Symptoms: Language Problems
Common Neurological Symptoms: Twitching or Muscle Fasciculations
Examination of the Limbs
Examining Patients in Coma
History and Examination of the Spine
Lumbar Puncture and Analysis of Cerebrospinal Fluid
Neurological Assessment: Movement Disorders
Neurological Assessment: Weakness and Sensory Loss
Neurological Examination: Cranial Nerves
Neurological Examination: Gait
Neurological Examination: Speech
Neurological Examination: Visual Function
Neurological History: General Approach and Common Pitfalls
Neuromuscular Assessment
Principles of Neurological Investigation
Quantitative Assessment of Pain
The Mental Status Examination in Neurology

[Back to Contents](#)

Neurological Issues in General Medicine and Surgery

Sessions:
Common Neurological Symptoms: Delirium
Common Neurological Symptoms: Headache
Common Neurological Symptoms: Movement Disorders
Common Neurological Symptoms: Post-traumatic
Common Neurological Symptoms: Seizures
Common Neurological Symptoms: Swallowing Disorders
Neurological Complications of Alcohol Misuse
Neurological Complications of Cardiac Disease
Neurological Complications of Endocrine Disease
Neurological Complications of Gastrointestinal Disease
Neurological Complications of Haematological Disease
Neurological Complications of Liver Disease
Neurological Complications of Renal Disease
Neurological Complications of Vitamin and Other Deficiency Diseases

[Back to Contents](#)

Surgical Principles and Techniques

Sessions:
Advanced Microsurgical Skills
Anterior Approach to the Lower Lumbar Spine
Application of a Halo or Traction to the Cervical Spine
Closing a Neonatal Myelomeningocele
Diagnosis and Management of Post-operative Haematoma
Fusing C1 to C2
How to do an Image-Guided Biopsy
How to do an Image-Guided Craniotomy
How to do an Interhemispheric Approach for a Colloid Cyst
Image-guided Neurosurgery
Inserting or Revising a Syringopleural Shunt
Inserting Pedicle Screws
Intraoperative Imaging Techniques
Intraoperative Neurosurgical Electrophysiological Monitoring
Minimal Invasive Neurosurgery
Minimally Invasive Surgical (MIS) Approaches to the Posterior Thoraco-lumbar Spine
Performing a Convexity Craniotomy
Performing a Craniotomy Convexity Meningioma
Performing a Far Lateral Craniotomy
Performing a Lumbar Laminectomy
Performing a Lumbar Microdiscectomy
Performing a Midline Posterior Fossa Craniotomy
Performing a Midline Supratentorial Craniotomy
Performing a Posterior Cervical Fusion
Performing a Pterional Craniotomy
Performing a Retrosigmoid Craniotomy
Performing a Subfrontal Craniotomy
Performing a Trans-sphenoidal Approach to the Sellar
Performing an Anterior Cervical Discectomy
Performing an Eye Brow Craniotomy

[Back to Contents](#)

Performing Burr Holes
Performing Posterior Cervical Decompression Procedures
Posterior thoracic approaches
Preparing the Operative Site
Principles of Awake Craniotomy
Principles of Surgical Scoliosis Correction
Prions and Neurosurgery
Surgery in Children
Surgical Approaches to Tumours of the Ventricle
The Modern Theatre Environment
The Operating Microscope
The Translabyrinthine Approach to the Cerebellopontine Angle
Use of an Endoscope
Use of Standard Neurological Equipment
Vertebroplasty and Kyphoplasty

[Back to Contents](#)

Core Radiology

Sessions:
CT Based Imaging Techniques
Digital Subtraction Angiography
MR Based Imaging Techniques
Normal Cranial Radiological Neuroanatomy
Normal Spinal Radiological Neuroanatomy
Normal Vascular Radiological Neuroanatomy
Nuclear Medicine Based Imaging Techniques
Spinal Myelography
Ultrasound and Doppler Imaging
X-ray Development, Physics, Uses, Risks and Regulation

[Back to Contents](#)

Headache and Pain

Sessions:
Acute Management Prevention of Migraine
Cluster Headache Acute and Prophylactic Treatments
Complex Regional Pain Syndrome
Diagnosis and Management of Trigeminal Autonomic Cephalalgias
Diagnosis and Treatment of Cranial Arteritis
Diagnosis and Treatment of Episodic Tension Type Headache
Diagnosis and Treatment of Migraine
Diagnosis and Treatment of Non – dental Facial Pain
Diagnosis and Treatment of Trigeminal Neuralgia
Differential Diagnosis of Headache
Head Pain: Epidemiology and General Considerations
Headache in Children and Adolescents
Idiopathic Intracranial Hypertension
Low CSF Pressure Headache
Neuropathic Pain
Other Trigeminal Autonomic Cephalalgias
Overview of Chronic Headache
Pain Related Anatomical Pathways and Physiology
Performing a MicroVascular Decompression for Trigeminal Neuralgia
Performing a Percutaneous Trigeminal Rhizotomy
Psychological Management in Chronic Headache

[Back to Contents](#)

Ischaemic Vascular Disease

Sessions:
A Structured Approach to the Investigation and Evaluation of the Cause of Stroke
Acute Stroke Treatment
Basic Principles of CT Interpretation for Acute Stroke
Cardioembolic Stroke
Impact of Stroke and Transient Ischaemic Attack on Individuals
Ischaemic Stroke: Carotid and Vertebral Artery Dissection
Neuroradiological Interventions in Carotid or Vertebral Artery Stenosis
Overview of the NIHR Stroke Research Network
Paediatric Stroke
Performing a Carotid Endarterectomy
Providing Advice to a Person With Stroke and Their Carer
Stroke Aetiology
Stroke Clinical Features Classification
Stroke Mimics
Stroke: Palliative Care
Surgical Management of Carotid Stenosis
The Impact of Stroke Upon Populations
The Pathology of CNS Ischaemia and Infarction
The Secondary Prevention of Stroke
TIA Clinical Features and Referral Pathways and Investigations
Vasculitis
Venous Stroke

[Back to Contents](#)

Haemorrhagic Vascular Disease

Sessions:
Aetiology and Pathophysiology of Spontaneous Intracerebral Haemorrhage
Aetiology and Pathophysiology of Subarachnoid Haemorrhage
Assessment and Emergency Management of Subarachnoid Haemorrhage
Cerebral Revascularisation
Cranial Dural Arteriovenous Fistulae
Definitive Management of the Aneurysm: Radiology
Definitive Management of an Aneurysm: Surgery
Embolisation for Arteriovenous Malformations
Familial Intracranial Aneurysms
Infantile Intraventricular Haemorrhage
Management of Spontaneous Intracerebral Haemorrhage
Management of Vein of Galen Malformations
Medical Management of Subarachnoid Haemorrhage
Paediatric Vascular Neurosurgery
Principles in Managing Cavernomas
Radiological Investigation of Subarachnoid Haemorrhage
Spinal Vascular Malformations
Stereotactic Radiosurgery for Arteriovenous Malformations
Surgery for Arteriovenous Malformations
The Diagnosis and Management of Spontaneous Subarachnoid Haemorrhage
Unruptured Intracranial Aneurysms
Vasospasm

[Back to Contents](#)

Head Injury

Sessions:
Cerebral Protection Strategies in Head Injury
Complications of Head Injury: Cranial Nerve and Vascular Complications
Complications of Head Injury: CSF Leak and Intracranial infection
Complications of Head Injury: Hydrocephalus, Seizures and Pituitary Dysfunction
Early Phase Care of the Moderate and Severely Head Injured Patient
Epidemiology of Head Injury
Evacuation of a Chronic Subdural Haematoma
Head Injuries in Children
Imaging in Head Injury
Inflicted Head Injury in Childhood: Non-accidental
Insertion of an Intracranial Pressure Monitor
Management of Depressed Skull Fractures
Management of the Head Injured Patient
Neuropathology of Head Injury
Neuropsychology and Brain Injury
Nutrition and Fluid Balance in the Head Injured Patient
Outcome After Head Injury
Overview of the Surgical Management of Head Injuries
Performing a Cranioplasty
Performing a Decompressive Craniectomy for Traumatic Brain Injury
Performing a Trauma Craniotomy
Safe Transfer of the Ventilated Head Injured Patient

[Back to Contents](#)

Transient Loss of Consciousness and Epilepsy

Sessions:
Acute Symptomatic Seizures
Assessment and Treatment of Refractory Epilepsy
Assessment of Patients Presenting with Blackouts
Brain Imaging in Seizures and Epilepsy
Cardiac Syncope
Causes of Epilepsy: Symptomatic
Childhood Absence Epilepsy
Choosing Antiepileptic Drugs For Focal Epilepsy
Choosing Antiepileptic Drugs For Generalised Epilepsy
Convulsive Status Epilepticus
Diagnosis of Frontal Lobe Epilepsy
Diagnosis of Temporal Lobe Epilepsy
Differential Diagnosis of Blackouts and Epilepsy
Epilepsy and Intellectual Disability
Epilepsy in Adolescence
Epileptic Seizures and Syndromes in Neonates and Infants
Idiopathic (genetic) Epilepsy
Interactions of Antiepileptic Drugs
Management of Epilepsy in Remission
Management of Epilepsy in the Elderly
Management of Women with Epilepsy: Reproductive Issues
Memory and Epilepsy
Monitoring Drug Therapy
Non-convulsive Status Epilepticus
Occipital and Parietal Lobe Epilepsies
Other Childhood Epilepsy Syndromes
Palliative Surgical Treatments for Epilepsy
Pregnancy and Epilepsy
Role of EEG in Assessment for Epilepsy Surgery
Role of EEG in the Diagnosis of Epilepsy

Social Consequences of Epilepsy
Starting Epilepsy Treatment
Surgical Treatment of Epilepsy Workup and Outcome
Temporal Lobe Surgery for Epilepsy
The Causes of Epilepsy: Idiopathic Epilepsy
The Classification of Seizures and the Epilepsies
The Diagnosis of Non –epileptic Seizures
The Diagnosis of Vasovagal Syncope
The Management of Non Epileptic Seizures
Use of Antiepileptic Drugs in Refractory Epilepsy

[Back to Contents](#)

Neurological Infections

Sessions:
Acute Pneumococcal and Meningococcal Meningitis
Aseptic Meningitis
Autoimmune Encephalitis
Botulism
Cerebral Malaria
Congenital Cytomegalovirus
Cryptococcal Meningitis
Diagnosing and Managing Patients with Tubercular Meningitis
Discitis Vertebral Osteomyelitis and Epidural Abscess
Encephalitis
Herpes Simplex Virus Encephalitis
HIV Encephalopathy
HIV Neuropathy
Human Prion Diseases
Imaging Features of Bacterial Brain Infection
Introduction to Neurological Infectious Diseases
Listeria Monocytogenes Meningitis
Lyme Borreliosis
Nervous System Manifestations of Varicella Zoster Infection
Syphilis
Tetanus
The Diagnosis and Management of Brain Abscesses
The Neurology of HTLV
Toxoplasmosis

[Back to Contents](#)

Neuro-inflammatory Diseases

Sessions:
Acute Disseminated Encephalomyelitis
Autoimmune Encephalopathies
Disease Modifying Treatments in Multiple Sclerosis: Interferons and Glatiramer Acetate
Multiple Sclerosis: Assessment and Diagnosis
Multiple Sclerosis: Basic Epidemiology and Pathophysiology
Multiple Sclerosis: Management of Relapses
Multiple Sclerosis: Other Disease Modifying Treatments
Neuro – Behcets
Neurological Manifestations of Lupus and the Antiphospholipid Syndrome
Neuromyelitis Optica Spectrum Disorders (NMOSD)
Neuropsychiatric Aspects of Multiple Sclerosis and White Matter Disorders
Neurosarcoidosis
Rheumatoid Sjogrens and Other Autoimmune Disorders Affecting the CNS
Symptomatic Therapies in Multiple Sclerosis
Transverse Myelitis: Causes Assessment and Management

[Back to Contents](#)

Neurodegeneration

Sessions:
Alzheimer's Disease: Current and Future Treatments
Alzheimer's Disease: Genetics and Current Hypotheses
Caring For Patients With Dementia
Clinical Aspects of Alzheimers Disease
Degenerative Dementias: Current Concepts and Overview
Dementia With Lewy Bodies: Basic Science and Pathology
Dementia With Lewy Bodies: Clinical Aspects
Frontotemporal Lobar Degeneration: Basic Science
Frontotemporal Lobar Degeneration: Clinical Syndromes
Huntington's Disease
Investigation of Dementia
Prion Disease: Epidemiology and Clinical Aspects
Prion Disease: Pathogenesis and Genetics
Vascular Cognitive Impairment: Current Concepts
Vascular Cognitive Impairment: Rare and Unusual Causes
Young Onset and 'treatable' Dementias

[Back to Contents](#)

Movement Disorders

Sessions:
Acquired Cerebellar and Spinocerebellar Ataxias
Classification and Epidemiology of Movement Disorders
Clinical Aspects of Progressive Supranuclear Palsy
Corticobasal Degeneration and the Corticobasal Syndrome
Diagnosis and Treatment of Essential Tremor
Drug – induced Movement Disorders
Dystonia: Classification and Genetics
Dystonias: Secondary Causes and Investigations
Features and Treatment of Parkinsonian Tremor
Features Causes and Treatment of Cerebellar Tremor Ataxia
Hereditary Cerebellar Ataxia
Hereditary Spastic Paraplegia
Multiple System Atrophy
Myoclonus
Parkinson's Disease Management of Motor Symptoms
Parkinson's Disease: Cognitive and Psychiatric Features
Parkinson's Disease: Surgical Treatment
Parkinson's Disease: Definition Pathogenesis and Pathology
Rare Causes of Tremor
Restless Legs Syndrome
Stiff Person Syndrome
The Genetics of Parkinsonis
The Primary Focal Dystonias
Tourettes Syndrome and Other Tic Disorders
Tremor Classification and Management

[Back to Contents](#)

Neuromuscular Diseases

Sessions:
Acquired Muscle Disease
Acquired Peripheral Neuropathies
Clinical Introduction to Neuromuscular Diseases
Clinical Neurophysiology of Neuromuscular Junction Disorders
Clinical Neurophysiology of Skeletal Muscle Diseases including ion channelopathies
Genetic Muscle Disease
Hereditary Neuropathies
Neuromuscular Junction Disorders
The Diagnostic Pathology of Neuromuscular Disease

[Back to Contents](#)

Coma and Sleep

Sessions:
The Assessment of Patients in Coma
Causes and Clinical Assessment of Coma
General Medical Care on Neurological Intensive Care Unit
EEG in Sleep Disorders and the MSLT
EEG in the Diagnosis of Coma
Excessive Daytime Sleepiness
Hypoxic – ischaemic Brain Injury
Narcolepsy
Neurological Complications of Critical Illness
Normal Sleep Architecture
Raised ICP, Herniation and Management

[Back to Contents](#)

Neuro-ophthalmology

Sessions:
Assessment of Double Vision
Assessment of Ptosis
Assessment of Visual Failure
Central Disorders of Saccadic and Pursuit Eye Movements
Chiasmal Disorders
Heredo – familial Optic Neuropathies
Ischaemic Optic Neuropathies
Nystagmus
Ocular Myopathies
Oculomotor Disorders
Optic Nerve Tumours
Optic Neuritis
Orbital and Cavernous Sinus Disorders
Papilloedema and Related Optic Disc Disorders
Pupil Abnormalities
Retinal Disorders in Neurological Disease
Retrochiasmal Disorders
Toxic Nutritional Optic Neuropathy

[Back to Contents](#)

Neuro-otology

Sessions:
Acute Vertigo and Dizziness
Anatomy and Pathophysiology of Dizziness and Vertigo
Benign Paroxysmal Positional Vertigo
Central Causes of Vestibular Disturbance
Central Disorders of Hearing
Chronic Dizziness – Clinical Presentation and Management
Diagnostic Approach of Dizziness and Vertigo
Falls in the Elderly: Assessment and Management
Hearing and Balance Tests
Hearing Disorders and Tinnitus
Meniere's Disease and Migraine Associated Dizziness
Peripheral Causes Vestibular Disorders Sensory Mismatch Syndromes
Principles of Vestibular Rehabilitation

[Back to Contents](#)

Diseases of the Autonomic Nervous System

Sessions:
Autonomic Failure Primary and Secondary
Functional Anatomy of the Autonomic Nervous System
Investigation and Management of Neurogenic Bladder Dysfunction
Investigation and Management of Neurogenic Sexual Dysfunction
Neural Control of the Bladder
Neurogenic Bowel Dysfunction
Neurological Control of Sexual Function
Parkinson Disease: Parkinsonism, Bladder, Bowel and Sexual Dysfunction
Pelvic Organ Dysfunction Following Cauda Equina Damage
Peripheral Nerve Disorders Bladder, Bowel and Sexual Dysfunction

[Back to Contents](#)

Elective Spinal Disease

Sessions:
Cervical Disease
Atlanto – axial Subluxation
Managing Cervical Degenerative Disease
Rheumatoid Arthritis in the Spine
Torticollis
Deformity
Adolescent Idiopathic Scoliosis
Congenital Scoliosis
Degenerative Scoliosis
Early Onset Scoliosis
Kyphosis
Management of Pectus Excavatum
Neuromuscular Scoliosis
Dysraphism
Spinal Dysraphism
Thoracolumbar Disease
Coccydynia
Diagnosis and Treatment of Back Pain
Inflammatory Spondyloarthritis
Management of Lumbar Disc Prolapse and Cauda Equina Syndrome
Osteoporosis
Sacroiliac Joint Pain
Spondylolisthesis
Spondylolysis
Surgical Treatment of Chronic Low Back Pain
Thoracic disc prolapse

[Back to Contents](#)

Spinal Tumours

Sessions:
Imaging Features of Intramedullary Spinal Cord Tumours
Intramedullary Spinal Cord Tumours
Radiology of Spinal Intradural Extramedullary Tumours
Principles in Managing Intradural Extramedullary Spinal Tumours
Surgical Treatment of Spinal Intradural Extramedullary Tumours
Malignant Spinal Cord Compression
Primary Bone Tumours of the Spine

[Back to Contents](#)

Spinal Trauma

Sessions:
Anatomy of the spinal column and spinal stability
Atlanto-axial Cervical Spine Fractures
Fractures of the Spine
Initial Management of Spinal Injury and Spinal Shock
Pre-operative Assessment and Anaesthetic Management of Patients with Spinal Cord Injury
Principles of Surgical Treatment of Spinal Injuries
Sacral Fractures
Spinal Injuries in Children
Subaxial Cervical Spine Fractures
Thoraco-lumbar Trauma

[Back to Contents](#)

Tumours and Cysts

Sessions:
Cranial Cysts
Pathology and Management of Dermoids and Epidermoids
Pathophysiology and Management of Arachnoid Cysts
Pathophysiology and Management of Colloid Cysts
Radiology of CNS Cysts
Radiology of Dermoids and Epidermoids
Glial Tumours
Emerging Treatments for Gliomas
Histology and molecular pathology of IDH wild type gliomas
Molecular Pathology and Histology of Ependymal Tumours (Ependymomas)
Molecular Pathology and Histology of IDH Mutant Gliomas
Non - surgical Management of Low Grade Gliomas
Pathology of Pilocytic Astrocytomas
Surgical Management of High Grade Gliomas
Surgical Management of Low Grade Gliomas
The Treatment of High Grade Gliomas
Tumours of the Brainstem
Lymphomas
Aetiology and Pathogenesis of Embryonal Tumours of the CNS
Histopathology of CNS Lymphomas
Imaging Features of Central Nervous System Lymphomas
Management of Primary CNS Lymphomas
Meningiomas
Aetiology and Pathophysiology of Intracranial Meningiomas
Characteristic Appearances and Differential Diagnosis of Meningiomas
Histopathology of Meningiomas
Management of Meningiomas
Metastases and Skull Lesions
Intracranial Metastases Imaging and Differential Diagnoses
Malignant Meningitis
Management Principles for Metastases
Skull Lesions

Nerve Sheath and Skull Base Tumours
Histopathology of Peripheral Nerve Sheath Tumours and Schwannomas
Management of Cerebellopontine Angle Tumours
Peripheral Nerve Sheath Tumours
Special Considerations for Skull Base Tumours
Stereotactic Radiosurgery for Acoustic Schwannoma
Principles
Anaesthetic Management of Supratentorial Tumours
Assessment of the Patient With a Brain Tumour
Clinical Presentation of Patients with Brain Tumours
Diagnostic Imaging in Brain Tumours
Histological and Molecular Diagnostics of Brain Tumours
Intraoperative Chemotherapy and Radiotherapy
Intraoperative Surgical Adjuncts
Long-term Complications of Radiotherapy and Chemotherapy for CNS Disease
Molecular Biology of Brain Tumours
Palliative Care and End of Life in Brain Tumour Patients
Paraneoplastic Neurological Disorders of the CNS and PNS
Principles of Brain Tumour Management in Children
Principles of Chemotherapy
Principles of Radiotherapy and Radiosurgery
Referral and Management Guidelines of Tumour Patients
Primitive Neuroectodermal Tumours
Aetiology and Pathogenesis of Embryonal Tumours of the CNS
Histopathology of Embryonal Tumours of the CNS
Imaging Features of Medulloblastoma and Other PNETs
Management of Medulloblastoma
Sella and Suprasellar Tumours
Aetiology and Pathophysiology of Pituitary Adenomas
Medical Management of Pituitary Adenomas
Pituitary Apoplexy
Management of Pituitary Adenomas for Surgeons
Tumours of the Central Nervous System: Craniopharyngioma
Management of Craniopharyngiomas

Ventricular and Pineal Region Tumours
Histology and Molecular Pathology of LGG incl Pilocytic Astrocytoma and Glioneuronal Tumours
Histopathology of Pineal Region Tumours
Imaging Features of Pineal Region Tumours
The Histopathology of Choroid Plexus Neoplasms

[Back to Contents](#)

Hydrocephalus and Cerebrospinal Fluid Pathologies

Sessions:
Aetiology and Pathophysiology of Hydrocephalus
Chiari Malformation
Cranial Cerebrospinal Fluid Fistula
Disorders of the Foramen Magnum
Inserting a Ventricular Access Device or External Ventricular Drain
Investigation and Treatment of Spinal Cerebrospinal Fluid Leaks
Management of Syringomyelia
Management Principles of Hydrocephalus
Normal Pressure Hydrocephalus
Performing a Subtemporal Decompression
Performing an Endoscopic Third Ventriculostomy
Spinal Arachnoiditis

[Back to Contents](#)

Neuro-rehabilitation and Spinal Injury Rehabilitation

Sessions:
Aetiology and Management of Pressure Sores
Autonomic Dysfunction
Bladder Problems in Multiple Sclerosis
Bowel Problems in Multiple Sclerosis
Clinical Gait Analysis in Rehabilitation Medicine
Diagnosis and Management of Cognitive Functioning After Stroke
Early Supported Discharge for Stroke
Family Relationships and Supporting Carers
Fatigue in Multiple Sclerosis
History Taking and Examination in Complex Neurological Disability
Locked – in Syndrome
Low Awareness States
Management of Spasticity and Associated Features
Management of Spasticity in Children
Management of Spasticity in Post Stroke Syndrome
Managing Late Deterioration in Neurological Disability
Multiple Sclerosis: Maintaining Activities Daily Living
Orthotics and the Avoidance and Management of Contractures
Pain After Stroke
Pain in Multiple Sclerosis
Physical Therapies After Stroke
Rehabilitation After Stroke
Rehabilitation in Nursing Homes
Role of Occupational Therapy in Neurorehabilitation
Speech and Language Problems and Their Management
The Assessment and Management of Swallowing Disorders
The Management of Posture and Mobility in Multiple Sclerosis
Vocational Rehabilitation Following Neurological Trauma or Illness

[Back to Contents](#)

Neuropsychiatry

Sessions:
ASD and Aspergers Syndrome
Bulimia Nervosa Lessons from a Patient's Perspective
Epilepsy and Psychosis
Forensic Neuropsychiatry
Functional Neurological Symptoms: Assessment
Functional Neurological Symptoms: Treatment
Medical Complications and Re-feeding for Anorexia Nervosa
Memory Disorders
Neuropsychiatric Syndromes in Dementia
Neuropsychiatry of Depression in Epilepsy
Neuropsychiatry of Epilepsy
Performing a Neuropsychiatric Examination
Principles of Developmental Neuropsychiatry in Children and Young People
Psychogenic Non-epileptic Seizures PNES
Psychopharmacology of Anxiety Disorders
The Diagnosis and Treatment of ADHD in Adults
The Forensic Neuropsychiatry of Neurodegenerative Disorders

[Back to Contents](#)

Neuropsychology

Sessions:
Cognitive Assessment in Epilepsy
Cognitive Assessment in Stroke
Cognitive Rehabilitation
Disorders of Executive Function
Occipital Lobe Cognitive Deficits
Parietal Lobe Cognitive Deficits
Perceptual Disorders
Speech and Language Disorders
Social Cognition Disorders
Temporal Lobe Cognitive Deficits

[Back to Contents](#)

Neuropaediatrics

Sessions:
Acute disseminated encephalomyelitis in children - an inflammatory CNS syndrome
Childhood Absence Epilepsy
Duchenne Muscular Dystrophy
Pediatric Stroke

[Back to Contents](#)
